

## **STATUS REPORT FOR JUNIOR VOLTAIRE & SAIMER NIEVES**

### **WEEK 3**

#### **This week we worked on:**

##### **Junior V:**

- Re-Designed Our Prototype to make accordingly to Scott and Jason's Feedback
- Organized Database Layout structures for Merchants and Customers
- Help Create Main Page for technical submissions for the capstone's resources
- Finished explanations for the technical designs for the backend, and model

##### **Saimer N:**

- Organized Technical Design Drawing for files
- Organized Database Layout structures for Stores and Subscriptions
- Help Create Main Page for technical submissions for the capstones resources
- Finished explanations for the technical designs for the frontend, includes, and images

**Both us:**

- Completed the prototype figma visual
- Completed prototype PowerPoint
- Completed Database Design
- Completed Technical Design Layouts
- Completed Main page creation

**In the upcoming week we plan to:****Junior V:**

- Work on the main page accordantly to the prototype. Focus on Header and Adding all stores
- Work on creating the sign\_up.php page and form.
- Work on creating the sign up SQL functions to push to accounts tables
- Finish adding php file upload to every div that needs images as design.

### **Saimer N:**

- Begin coding accordantly to our files from the Technical Design Layout.
- Work on structuring the login Tables in SQL
- Work on creating the log\_in.php page
- Work on creating session variables for logins

### **Both of Us:**

1. Well complete the main page site and the login features.
2. Complete the functions to successful add to table the accounts created.
3. Be able to authenticate users based on the logins

### **Impediments/roadblocks**

### **Junior V:**

- Creating functions and variables to add to table and call back to add to session variables

**Saimer N:**

- Finding best way to relate tables to each other using a foreign key. May have to research or practice
